

Production Fluid Treatment Plants

Complete modular fluid treatment plants for oil field production. Triphasic separation + water treatment + filtration — all integrated in transportable, skid-mounted modules.

Filtration

H2O LIFE INN

PRODUCT OVERVIEW

IPC, in strategic alliance with H2O LIFE INN, offers complete production fluid treatment plants engineered to maximize efficiency with modular, transportable technology. Systems are designed for each field's specific conditions through a full engineering cycle: field visit → engineering design → construction → installation → commissioning → operator training.

Technological advantage vs. conventional equipment: greater processing capacity per unit area, lower operating cost, lower CAPEX, modular units for staged expansion. Plants integrate the T-CASH triphasic separator, T-CASH water treatment module, and synthetic media filtration packages in a single processing train.

TECHNICAL SPECIFICATIONS

Technology Partner	H2O LIFE INN (strategic alliance)
Systems	T-CASH Separator + T-CASH Water Treatment + Filtration
Capacity	10,000 to 30,000 BFPD per train (scalable)
Deployment	Modular, transportable, skid-mounted
CAPEX Advantage	Lower vs. conventional treatment plants
Footprint	Smaller area per unit of throughput
Engineering	Field diagnosis → design → build → install → commission
Training	Operator training and startup support included

KEY FEATURES

- Complete integrated treatment plant
- Modular — field scalable in stages
- Skid-mounted for rapid deployment
- Greater capacity vs. conventional tech
- Lower CAPEX and OPEX
- Smaller field footprint
- Full project cycle: diagnosis to startup
- Operator training included

APPLICATIONS

- Oil field satellite treatment stations
- Central gathering & treatment facilities
- Produced water management
- Enhanced oil recovery (EOR) support
- Remote and offshore field locations

MANUFACTURER / SUPPLIER

H2O LIFE INN (Technology Developer) IPC Corporation (Authorized Distributor — South America & Caribbean)
