

Pump Rods & Sucker Rods

High-quality sucker rods for greater strength, durability and extraction efficiency. Full grade range from Grade C to SSHS, 5/8" to 1-1/4" diameters, reducing downtime and maximizing production.

Sour Service

SSHS

PRODUCT OVERVIEW

IPC offers a complete line of sucker rods designed for greater strength, durability, and extraction efficiency in beam-pump artificial lift systems. Available in seven API 11B grades — from Grade C for light-load, non-corrosive wells to Grade SSHS for extreme loads with maximum fatigue and corrosion resistance.

All rods are manufactured to API 11B standards in standard 25 ft and 30 ft lengths, plus custom pony rods from 2 to 10 ft. The full range of coupling types and material grades ensures the right rod for every well condition, maximizing run life and minimizing workover frequency.

TECHNICAL SPECIFICATIONS

Standard	API 11B
Grades	Grade C, K, D Carbon, D Alloy, KD Special, D Special, SSHS
Diameters	5/8", 3/4", 7/8", 1", 1-1/8", 1-1/4" in
Sucker Rod Length	25 ft (7.62 m) or 30 ft (9.14 m)
Pony Rod Lengths	2 – 10 ft and custom
End Types	Class T coupling · Reduced diameter · SM coupling
Materials	AISI C1541M, 4142M, 4320M, 4330M (carbon & alloy)
Service	Standard, sour gas, high-load, corrosive wells

KEY FEATURES

- API 11B grade range: C through SSHS
- Diameters 5/8" to 1-1/4"
- Reduces downtime, maximizes production
- Standard 25 ft and 30 ft lengths
- Custom pony rod lengths 2–10 ft
- High-strength alloy steels (HS, SSHS)
- Sour and corrosive service grades

APPLICATIONS

- Beam pump (rod pump) artificial lift
- Heavy and extra-heavy oil extraction
- High-load deep wells
- Sour gas and corrosive environments
- High-cycle fatigue applications

MANUFACTURER / SUPPLIER

Found Equipment — Focus on Petroleum Equipment Certified API 11B manufacturers
