

Sucker Rods (API 11B)

High-strength steel sucker rods for artificial lift. Seven grades from Grade C to SSHS. Diameters 5/8" to 1-1/4", standard 25 ft and 30 ft lengths, custom pony rods available.

API 11B

5/8"–1-1/4"

7 Grades

25 ft / 30 ft

Pony Rods

Grade SSHS

PRODUCT OVERVIEW

Sucker rods transmit reciprocating motion from the surface pump jack to the downhole pump in beam-pump artificial lift systems. IPC supplies API 11B sucker rods across a full range of diameters and grades — from Grade C for light, non-corrosive service to Grade SSHS for extreme loads with maximum fatigue and corrosion resistance.

Available in standard 25 ft (7.62 m) and 30 ft (9.14 m) lengths, plus pony rods in 2–10 ft custom lengths. End types include Class T coupling, reduced diameter and SM coupling. Materials range from AISI C1541M (carbon) to 4330M (high-strength alloy).

TECHNICAL SPECIFICATIONS

Standard	API 11B
Application	Beam pump artificial lift systems
Diameters	5/8", 3/4", 7/8", 1", 1-1/8", 1-1/4" in
Standard Length	25 ft (7.62 m) or 30 ft (9.14 m)
Pony Rod Lengths	2, 4, 6, 8, 10 ft — custom available
Grades	Grade C, K, D Carbon, D Alloy, KD Special, D Special, SSHS
Materials	C1541M, A4621-M, 1530M, 4142M, 4320M, 4330M
End Types	Class T coupling · Reduced diameter · SM coupling
Sour Service	Grade SSHS for corrosive/heavy load wells

KEY FEATURES

- Full API 11B compliance
- 7 grades: Grade C through SSHS
- Diameters 5/8" to 1-1/4"
- 25 ft & 30 ft standard lengths
- Custom pony rod lengths (2–10 ft)
- High-strength alloy grades (HS, SSHS)
- Suitable for sour and corrosive service
- Carbon and alloy steel options

APPLICATIONS

- Beam pump (rod pump) artificial lift
- Heavy oil extraction
- Sour gas and corrosive well environments
- High-load deep wells
- CO2 flood and water flood wells
